
Education

American International University – Bangladesh

2022-Present

BSc. in CSE

Skills

- Language : JavaScript, TypeScript, C#, PHP
 - DevOps Tools: Linux, Docker, CI/CD with Github Actions, AWS
 - Backend: Node, Express, PHP, Python
 - Other: Tailwind, Bootstrap, DaisyUi, Material UI, Sanity, CSS, HTML, OOP
 - Frameworks: React, NextJs, SvelteKit
 - Database: MS SQL, Oracle, MongoDB, MySQL
 - Platform: Vs Code, Microsoft visual studio, Github, Linear app, Firebase, Netlify, Vercel
-

Work Experience

Web Developer Intern | [Edistys](#) | [Certificate](#)

May 2024 – August 2024

- Developed and maintained front-end web applications using TypeScript, React, and SvelteKit
 - Implemented Sanity.io for efficient content management and utilized Tailwind for responsive styling
 - Optimized JavaScript and CSS, improving performance and user experience
 - Collaborated with cross-functional teams, ensuring timely project deliveries and successful launches
-

Projects

Aiub Connect | **Student-led campus solutions project** | [Live Link](#)

- Developed About, Team, and Resource Management pages
- Built Admin Dashboard with resource, team, and profile management
- Currently developing Community Help feature for student collaboration
- **Technology Used: PHP, MySQL, JavaScript, HTML, CSS, Tailwind**

Coffee Shop Billing System (Desktop App) | [Github Repo](#)

Duration – 4-5 Days

- Developed a desktop-based Coffee Shop Billing System using C# and MS SQL Server for secure, role-based (Admin/Employee) access.
- Admin manages products, employees, and invoices; Employee creates invoices and processes orders.
- Leveraged a normalized database structure to ensure data accuracy and streamlined record-keeping.
- **Technology Used : C# , MS SQL : IDE – Microsoft Visual Studio**

TradeSwift Website | **(Team Project)**

Duration – 3-4 Weeks

[Git Client](#) | [Live Link](#) | [Git Server](#)

- Integrated deposit/withdrawal features with real-time trading indicators and user-specific trading history.
- Enabled trading tournaments for enhanced engagement, alongside robust user management and transaction oversight by Admins.
- **Utilized** Next.js, JavaScript, Node.js, Express.js, MongoDB, SSLCommerz, and Socket.io to ensure secure, scalable, and interactive functionality.
